Welcome to the
5th issue of
‘The Creek Gazette’

Time had stood still all this while. But now that it seems to have got its set of wheels back, it's time for children to arrive on those wheels. To a place they have been waiting for - their school, for their friends and their tomorrow. We're set to welcome them to a future that's new.

EXPERIENTIAL LEARNING @ CREEK

Learning is the process where by knowledge is created through the transformation of experience
- David A. KOIB

We at creek believe that experiential learning is an engaged learning process where our students “learn by doing” and by reflecting on their experiences. Opportunities are provided for students to take initiative, make decisions and be accountable for their learning. Along with this the students are also provided with opportunities to engage intellectually, creatively, emotionally, socially and physically.

During experiential learning the learners are guided by our facilitators to notice the connections between one context and another in both theory and the experience. By providing different learning initiatives, the chances are increased for the students to assimilate the information effectively and it also helps them to develop insights that may have been out of their capability when the learning had been in a different style.

FROM THE DESK OF THE SCHOOL HEAD

The diverse of love makes us closer by heart, and the inclusion of thought makes us deeper by mind! -Suki

At its core, inclusive education is about appreciating each individual's differences and unique set of strengths and limitations. It's not just an education philosophy; it's an important life skill.

Children grow into adults who live in a world filled with people, different from themselves;

learning how to interact and work with these people is a key accomplishment of

childhood, as integral as academic proficiency. Inclusion is about people gaining "social acceptance", having positive interactions with one's peers and being valued for who they are. As such, it must be "internally motivated" and stem from embracing the belief that all people have value and the right to belong.

We value:

Learning that prepares students for lifetime success and leadership

Excellence pursued without compromise

Achievement supported by a climate that celebrates each person's success

Diversity of ideas and people

Ms. P. HIMAJYOTHSNA,
Principal - TCPS (Mercury)

Tete - e - Tete with our Parent

Mr. & Mrs. P. Jaya Chandra & P. Chaitanya
Parents of Advaith Reddy Pemireddy, PP2.

How do you feel being associated with our School?
Feeling happy to be associated with The Creek Planet School.

Is your child enjoying at school?
Yes, and he is a very active child and grasps everything very quickly. He participated in various activities and he brings those to home and shows us with lots of happiness. He also completes his homework perfectly.

What is the change you observed in your child?
My child is looking forward to come to school. He is enjoying his time in school and learning new things each and every day. He participated in a variety of activities. He is having a great time and lots of fun too!

Would you recommend others? If so why?
Yes because of the curriculum being followed by the school, teaching standards, good teaching staff and moral values imparted to the children by the teachers.

Voice of a Teacher

WOMEN – A CELEBRATION OF LIFE

Ms. G. Harshini
English Mentor

"DON'T LET ANYONE TELL YOU, YOU'RE WEAK BECAUSE YOU'RE A WOMAN"- MARY KOM

Every year on March 8th, on Women's Day, we witness efforts by activists, professional women raising their voice for equal and sustainable future, but the real issue is what change has it brought to the world? Are all of the problems that women face, resolved? Dominance, bigotry, exploitation, and violence rates all seem to be decreasing? Is women accorded the respect that they deserve? All of these questions are still answered with a resounding 'NO'.

In this smart and innovative age, it is a disgrace that women are abused and forced to follow superstitious ideas. It is our job to break free from patriarchal society's shackles and acknowledge women's worth and existence. It is not only men's work and obligation to understand other women; it is also a women's job and responsibility.

Women can achieve great things with just a little encouragement as well as support and turn their imaginations into a treasure chest...with only sparkling, glittering, and gilded goods hidden and locked inside. They only show up when it's the proper time. At the end of the day, the world needs to know one thing... Women don't require a special day to recognise their significance; their very presence is a celebration of life!!!

Voice of a Student

CARE & SUPPORT

Board exams are one of the greatest challenge a student faces. Any sort of preparation for this is welcome. After all, our board marks change our life. The past two years of the COVID-19 pandemic have affected all our lives, especially students. Our education had been drastically affected, but my school tried its utmost to handle it well. To better equip us to write the exam, the school has initiated extended hours. Everyday, after school timings, the 10th graders stay back and study for the exam. We are also writing pre-board examinations as a final practice, and revision tests on non-examination days.

The school provides us the perfect environment and the teachers strive their best in helping us to do our best. The school feels amazing in the evening, and it's truly worth experiencing. In the end, I wish all my fellow students all the very best for the board exams.

FROM THE DESK OF THE SCHOOL HEAD

The choices you make in your activities reveal the truth of your character. There is no student who is unable, but only a few who are aware of their right application. Every child is a gift and is capable of doing beautiful things, and it is our prime responsibility as teachers to knock into these capabilities of students and help them model the best version of themselves.

True education aims to develop both character and knowledge. Education is a balance between knowledge and values. This month's value is inclusion, which is one of the most important qualities to instill in our students in order to develop decent citizens with a positive view and demeanor. We can't always plan for the future for our youth but we can build the youth for future.

**Ms. Genevieve Michale,

What are your views on the learning journey of your ward at our school?

We are privileged to say that we had a great start of our son's education career in Creek planet school. Undoubtedly, Creek is one of the best schools we have seen. Creek team has good thoughts and values on how a child should be developed from childhood. We are very much impressed with the teaching methodology which enables the child to grasp the concepts easily and quickly

Did your ward enjoy coming back to school?

My child loved attending school for physical classes. We would like to take this opportunity to thank Creek Planet school-Neptune campus Management for making the transition happen seamlessly from online to offline.

IMPORTANCE OF MATHEMATICS IN DAILY LIFE

**Mr. Rakesh Rayarapu
Maths Mentor**

Math is essential in today's world. Everyone uses mathematics in their daily life, and most of the time they are unaware of it.

Our world would be lacking a vital component if it didn't have arithmetic. The most significant aspect of math is that it aids in brain development.

Our brain is made up of cells, and when we do math, our brain's neurons are stimulated. Math instills in us the ability to think clearly and creatively. It helps us to increase our capacity to reason analytically. You will need math to survive in this planet.

Math's importance is comparable to that of oxygen in the air; without it, no human progress can be made.

Voice of a Student

COMPUTING AND CODING CLASS

The computing lesson covered during the coding class piqued my curiosity in coding. The most impressive of them all was an app based on Hogwarts from J.K. Rowling's Harry Potter books. Making Captain America's shield out of simple block codes was very interesting.

This made coding appear as if complete beginners could create something unique and creative without needing to learn coding for hours on end. Coding isn't only about finding and fixing faults in software; it's about having the desire to make the world a better place. Coding may transform shards into a lovely tapestry. I owe it to the coding class to have taught me this.

SESSION ON COMPUTATIONAL THINKING

An online session was held on Computational Thinking and Future Computers by Aanand Srinivas on 23rd of March'22. The session was on the basics of CODING AND FUTURE COMPUTERS.

The students learnt to fix and try again in different ways when something doesn't work out. The session helped students realize how easy it is to form and give code to online characters using StayQrious tools. The session also equipped kids with the ability to stick with a problem and work on finding a solution and to develop an appreciation for how things work.

Creating a Happy and Healthy Learning Environment

A happy and healthy classroom is one that is rational, wholesome, and inclusive. Teachers at the Creek Planet School Orbit Campus want to create a perfect learning environment, and one of the best ways to do so is to use Inclusive Education. But, first and foremost, what is Inclusive Education? It is a teaching approach in which all pupils, regardless of aptitude, learn together in a same classroom. Our goal at Orbit is to ensure that all orbitians are treated equitably and given equal access to opportunities.

**Ms. K Shireesha,
Principal - TCPS (Orbit)**

Our teachers seek to make our school a place where every kid can participate by using a variety of teaching methods, doing multiple integrative activities, and crafting lessons that reach out to all sorts of pupils. More than just classroom learning, Orbit Campus' inclusive education develops an atmosphere of respect and harmony, as well as the opportunity to learn about appreciating individual diversity.

Tete - e - Tete with our Parent

**Mrs. Rama Tulasih

in conversation with Mentor**

What would you like to say about your child's academic performance?

I am quite pleased with our two children's performance. They take an active role in all of the activities that are carried out.

How are the children enjoying their activity classes?

Teachers create a positive learning environment in the classroom by engaging students in various activities. My children are enthusiastic about learning and the process of learning. They've grown to be pretty self-sufficient.

Would you like to make any recommendations for the development of children's personalities at school?

Reading novels about moral principles will be very beneficial to the children in imbibing values. Teachers can give the pupils a few books to read.

“KEEPING SAFE IS THE FIRST STEP TO PROGRESSION”

The most basic information that any youngster should have is how to stay safe. When it comes to safety, today's children are vulnerable, but they are also clever enough to protect themselves. As a result, we invited Mr. Praveen Reddy, the Sub-inspector, to give a guest lecture to our children in grades 6 to 9. The lesson began by raising awareness about how youngsters can use technology to protect themselves when they are in danger.

The workshop continued with one-on-one interaction with the guest, during which the youngsters addressed various situations involving personal safety and the precautions that should be done to protect others in similar situations. Fears and preconceptions about the police department were gradually dispelled from the minds of the younger generation, and they felt at ease in expressing their concerns regarding real-life events.

FROM THE DESK OF THE SCHOOL HEAD

Inclusion in education refers to a model in which students with special needs spend the majority of their time with students who do not have special needs. It emerged in the context of special education with a tailored education programme, and is based on the idea that having varied experiences allows students with special needs to be more successful in social relationships, leading to greater success in life.

Educational administrators implement inclusive education models in order to move away from segregated special education models to the greatest extent possible. The assumption is that it will assist both general and special education kids, with the more able students serving as role models and the less able individuals serving as motivation for public school students to gain empathy.

Students with disabilities are given priority in terms of full participation and respect for their social, civic, and educational rights. Feeling included encompasses the complete range of human diversity, including ability, language, culture, gender, age, and other human distinctions, in addition to physical and cognitive limitations.

Mr. Soumitra Singh Thakur
Principal - TCPS (Venus)

Tete - e - Tete with our Parent

Mr. K Kiran Kumar
Parent of Kum. K. Shivani, VII A2
in conversation with Principal.

What is your opinion about the school?

Creek School, in my opinion, is an excellent place for students to develop themselves. It's a fantastic school with outstanding teachers and their support. It is an excellent platform for students to accomplish their objectives. Teachers have a terrific method of approaching students. Apart from academics, the institution instils moral values and ethics in the students.

There is no distinction between online and offline education. Every week, teachers devise new activities to pique students' interest in paying attention in class. They made learning easier by using other websites and apps.. My children's instructors were supportive.

How would you like to see your child in future?

I want my child to be well-educated, competitive, a good and intellectual person with self-confidence. Apart from studies, I want my kid to learn- ethics and good values. And I am confident that my kid will develop these qualities with the support of creek school.

Voice of a Teacher

WOMEN EMPOWERMENT

"One book, One pen, One child and one teacher can change the world".

Women empowerment does not imply granting her wealth. It starts with tiny, but significant, steps that result in good transformation.

Ms. Arunajyothi,
Social Science Mentor.

Women should be able to determine how they will overcome societal challenges with education. "Not only can an educated female live life on her own terms, but she can also change the world." Their empowerment begins in our homes, businesses, and communities. assisting girls and women in learning advocacy skills at all stages of life in order to successfully use their voices for their rights.

When a girl receives an education, she can achieve a lot: a decent job, a higher income, healthier children, and a better quality of life for her family and community. "The key to economic prosperity, political stability, and social revolution is empowering girls." Beti Bachao Beti Padhao, Ujjawalaa, Nari Shakti Puraskar, Mahila Shakti Kendras, Nirbhaya, and other government programmes received good support.

GENDER EQUALITY TODAY FOR A SUSTAINABLE TOMORROW

International Women's Day allows us to honour the political, social, economic, and cultural accomplishments of women and girls all around the world. "Gender equality today for a sustainable tomorrow" is the theme for this year.

One of the most fundamental issues humanity faces in the twenty-first century is advancing gender equality while also addressing climate change. Globally, efforts to promote sustainability and gender equality must go hand in hand. Mujica has pledged to improve women's contributions in the field of standardization.

This year Women's Day celebration coincides with a historic global movement for women's rights and equality. In light of this, I'd have an intention to join the @INTGenderChamps. Sergio Mujica (Sergio Mujica)

FROM THE DESK OF THE SCHOOL HEAD

"All children and young people have the right to access education that is responsive to their needs." Inclusionary education works for students and teachers, classrooms, and communities, according to research. Small adjustments can lead to bigger changes, which can spread throughout the classroom and educational system. We follow a few essential concepts at our school that characterise inclusive education.

Each student is distinct, as is each group of pupils. School diversity is unavoidable. Learners come from a variety of backgrounds, cultures, beliefs, and values. We establish a learning environment in the school by holding unique assemblies on monthly themes and values, as well as celebrating and educating students on religious holidays.

Educators recognise that each student have unique strengths and abilities. Curriculum planning and execution bring these strengths, as well as a student's individual requirements, at the forefront. Student engagement, motivation, and academic achievements have all improved as a result of a strengths-based and personalised curriculum. This method has embraced diversity and difference while also allowing for individualised learning.

Ms. B. Preethi Reddy
Principal - TCPS (Sr. Seeds)

Tete - e - Tete with our Parent

Mrs. Aravindha Rao,
Parent of Mast. Rishwith, PP2

What do you feel about physical schooling?
Physical schooling, in my opinion, aids in the development of pupils' competence and confidence. It enables kids to participate in a variety of physical activities that are important in their life, both within and outside of school.

Have you noticed any major changes in the child?
I've noticed a few changes, such as my child is trying to communicate in English, speaking about healthy food and saying no to mobile.

How had been his progress throughout this transition period?
Yes, I believe he has made improvement; initially, my child did not display any interest in what was going on at school, but now he is extremely eager to talk about what is going on at school and what role he plays in it.

Voice of a Teacher

"EARTH HOUR- CARING FOR OUR FUTURE ! "

Ms. Shrilatha Raju
Primary Teacher

Earth Hour is one of the world's largest environmental grassroots movements. The World Wide Fund for Nature (WWF) launched it in Sydney, Australia, in 2007. It takes place every final Saturday in March for one hour, from 8.30 p.m. to 9.30 p.m. The entire world is turning off their lights to demonstrate their support for the earth. The movement is an open-source platform that allows everyone from anywhere to join in and help save the planet. Earth Hour is all about bringing environmental issues to the attention of our global and local communities. It's a yearly event. It is an annual global event that encourages individuals, communities, businesses, and families to turn off their lights in support of the battle against climate change and a commitment to a better world. We rely on natural systems, which are critical to our long-term survival. Unfortunately, the unparalleled worldwide loss of wildlife over the previous half-century requires immediate global response. Every year, nature gives us clean air, water, food, and services worth trillions. Earth Hour is significant because it allows us to work toward bettering natural resources while also imagining what our lives will be like if we do not fight for the earth. Let us join hands and recite Earth's scary reminder: "Lights OFF, we have Stars and Moonlight ON."

FIELD TRIP - SCIENCE SYMPOSIUM PROJECTS

A field trip to Venus campus was held on the 9th and 10th of March 2022 to explore the Science Symposium projects. The children were engrossed in a variety of themes, including plastic handicraft chimes, footwear, and constructing a pencil case, as well as drip irrigation systems made from repurposed plastic bottles.

However, the emphasis was mostly on reducing, reusing, and recycling all plastics now in use for various purposes. We can't totally avoid plastic, but we can decrease its use and recycle it for a variety of applications. Children's participation in the field trip has sparked fresh thought processes. This field trip has not only piqued attention, but it has also highlighted the facts that children should remember from their infancy.

FROM THE DESK OF THE CENTER HEAD

The value that was taken up this month is 'inclusion'. There is no doubt that students and teachers must understand the importance of inclusivity in the classroom. Schools should value the unique contributions that students from all backgrounds and skill sets bring to the classroom and encourage diverse groups to grow alongside one another for the benefit of all.

Inclusion necessitates teachers believing that all students have valuable contributions to make in the classroom. As a result, our teachers attend training sessions every year in order to

be confident and competent in teaching children with a variety of needs. This month's value is particularly appropriate because it is related to International Women's Day. This year's Women's Day theme is BreaktheBias, which means that talent should always be evaluated holistically, not just from a gender perspective. Let us work together to create a more diverse, equitable, and inclusive world

**Ms. Vani Lanka,
Center Head - SPS (Mars)**

Tete - e - Tete with our Parent

**Mr. Uma Maheshwar Rao Meghraj,
Parent of Mast. Adhrit Meghraj, PP2 in conversation
with mentor**

Did you notice any change in your child after he started attending offline classes?
Though Adhrit was cranky in the initial days to attend the school, he got adjusted to the school now and is enjoying it. He started framing sentences and started to converse in English. He has improved his eating habits. I would like to thank all the staff, teachers, and helpers working towards creating a safe and happy environment for all kids at the school.

Do you have any suggestions or recommendations for us?

Nothing more specific to say, everything is going well as of now. However, I would request you to give activity based homework that would be fun and encourages the child to complete it fast.

EARTH HOUR

**Ms. Talasila Sravanthi Chowdary,
Grade III Mentor**

Every year since 2015, on the last Saturday of the month of March, the world celebrates EARTH HOUR Day. It is celebrated from 8:30 p.m. to 9:30 p.m. by switching off the lights and all electrical appliances. An interactive whole school assembly was conducted in the school to spread awareness about environmental issues among students.

As a part of school activity the whole school switched off all the electrical devices for one hour and mentors spoke about the global warming and why it is important to save energy. Including Students in such events would help to create awareness in them towards the intensity of climate change and its impact on our planet, Earth.

let's raise awareness of the interconnected issues facing our planet and build a safer, healthier future for people and nature together.

Voice of a Student

I LOVE GOING BACK TO SCHOOL!

School is a safe place where I'm the most "me." I wake up much happier. I have confidence in my routine, and I am surrounded by friends who make me feel excited to start the day. The hardest part about attending school remotely was there were no friends to talk and play. I am now physically returning to school.

I get up early because the thought of meeting my friends and learning my subjects while doing activities gives me a jump start on the day. I participate in sports to stay fit and fragile. I have my teacher in front of me, who answers all of my questions right away.

In Focus

“A woman is the full circle. Within her is the power to create, nurture and transform.”

In order to bring awareness to children about the importance of women in their lives, we have taken the theme for the month of March as "International Women's Day." Students engrossed themselves in drawing and colouring competitions and made posters to appreciate their mothers for the remarkable strength and perseverance they show in making them the best.

To make every woman who visits our campus feel loved, strong, and appreciated, an activity was held in which the mothers of our students were greeted with a rose and a chocolate and given the opportunity to share how empowered they felt about being a woman. We thank the mothers for being very proactive.

Messages:

FROM THE DESK OF THE CENTER HEAD

Looking at how our classrooms, activities, and courses are constructed so that all students may participate and learn is what inclusive education is all about. Inclusion also entails experimenting with different teaching methods to ensure that all students are actively involved in the classroom.

A child does not need to be prepared in order to be involved. At all times, all children are prepared to attend conventional schools and classes. It is not necessary for them to earn their participation. Teachers can be creative by learning new ways to educate or developing classes so that all children can participate. We have to create a welcoming environment for all students in the school. Inclusion is a value that represents the expectation that we will work together.

**Ms. Shanmugavalli Anisetty,
Center Head - SPS (Uranus)**

in Conversation with Mentor**

Are you satisfied with the progress of your child this academic year?

Though it was a tough time for all of us due to the pandemic, with the support of teachers and school management kids were able to understand the concepts and completed the academic year successfully and we are very much satisfied with the progress of my child.

What feedback you would like to give to teachers and the school?

The teachers are very understanding and friendly; they keep providing positive inputs to the children and keep up their well-being. The teaching methodology made my child understand the concepts easily. We are very happy to be a part of the Seeds Uranus.

शिक्षा का महत्व

**Ms. Suman Tripathy,
Hindi Mentor**

विधा एक ऐसा धन है, जिसे कोई चुरा नहीं सकता, ना कोई छिन सकता है यह एक ऐसा धन है, जो बाँटने पर कम नहीं होता बल्कि बढ़ता है। जीवन में सफल होने और कुछ अलग करने के लिए शिक्षा हमारे लिए महत्वपूर्ण साधन है यह हमें जीवन के कठिन समय में चुनौतियों से सामना करने में सहायता करता है। पूरी शिक्षण प्रक्रिया के दौरान अर्जित ज्ञान हमें अपने जीवन के प्रति आत्मनिर्भर बनाता है। 'शिक्षा वह नींव है जिस पर हम अपने भविष्य का निर्माण करते हैं।'

सूमन त्रिपाठी

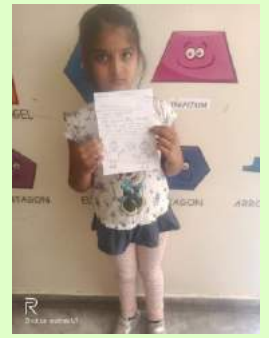

'धन्यवाद'

INCLUSION - VALUE OF THE MONTH

This month we've learned the value of inclusion, which is being included. Every month, we learn about values and themes at our school. My teachers use various activities such as storytelling, sketching, and role play to explain and debate the principles and topics in class and during assemblies, making it easier for us to understand. Inclusion is regarded as a basic human right.

The goal of inclusion is to embrace everyone, regardless of colour, gender, handicap, medical needs, or other factors. It's all about equal access and opportunities, as well as eliminating discrimination and intolerance.

THE BEGINNING OF NEW ACADEMIC YEAR

4th March 2022 – The beginning of new Academic Year 2022 – 23 was celebrated with bustling joy and enthusiasm at SEEDS Uranus Campus.

The complete team of SEEDS Uranus including the supporting staff eagerly waited to welcome the tiny tots. The welcoming was innovatively planned, well organized and perfectly executed by the enthusiastic team of mentors.

Children were given grand welcome in different ways like giving a high five, a spin, a shake and a roly polly, which they enjoyed. Later the event of “Balloon releasing” was organized by Center Head, amidst loud cheers and shouts of the little children, to give the tiny tots the feeling of freedom from virtual schooling. It was a feast to eyes to see the little ones jumping with joy as the balloons flew high in the sky.
