INVESTITURE CEREMONY @ THE CREEK PLANET SCHOOLS

Leadership is the capacity to translate vision into reality. - Warren Bennis

The Investiture Ceremony of the creek planet schools for the academic session 2022-23 was held with great pomp and dignity in a special ceremony at our school campuses. The event was conducted with the high degree of earnestness and passion. The Investiture ceremony signifies the reliance and confidence that the school consigns in the newly invested office bearers. Donning the mantle of accountability, they also pledge to bestow their duties to the best of their abilities. We strongly believe that the child centric approach will frame a responsible citizen.

FROM THE DESK OF THE SCHOOL HEAD

“The supreme quality for leadership is unquestionably integrity. Without it, no real success is possible, whether it is on a section gang, a football field, in an army, or in an office.” – Dwight D. Eisenhower

Integrity is the quality of adhering consistently to high ethical standards. Integrity is based on honesty, trust, and constancy. It is a quality that attracts people to them since it shows that they can be relied upon. They have principles, and you can rely on them to act honorable in their capacity as employees. We witness and hear about several unethical activities and new stories every day. Corruption and illicit activity are prevalent. These are all results of lack of or declining integrity. Integrity is a significant quality that can improve life.

It is a trait that reveals who you are. Academic integrity as a student is acting morally, seeking clarification, and adhering to rules, especially under trying circumstances. If someone is dishonest and untrustworthy, no one can live in peace. Nobody can build meaningful relationships with others without honesty. Integrity is crucial and necessary for all aspects of daily life to run smoothly. Without it, you won't be able to tell what is good from wrong, and your efforts will be in vain. To make life more tranquil and happy, we must live with honesty.

Ms. P. HIMAJYOTHSNA,
Principal - TCPS (Mercury)

Tete - e - Tete with our Parent

Mr. & Mrs. R Udaya Kumar
Parents of Mast. Shobith U, I A1.

How do you feel being associated with our school?

It's mesmerising for my son to be a part of The Creek Planet School, Mercury Campus. Education is very standard and the way of teaching and methodologies are very satisfying. Campus is very good with all amenities structured.

What are the changes you observed in your child holistically?

Shobith has understood the way of studying, discipline and Obedience has been changed.

Will you suggest our school to others?

Yes, I will support and suggest Creek Planet Mercury Campus to my friends and Neighbours.

What is the input the child shares about the school?

He shares about the way of teaching at school, he loves to go to school and he also likes extracurricular activities, especially Swimming and Yoga.

Voice of a Teacher

INTEGRITY

Integrity is the trait of being true, loyal, and truthful in behaviour, speech, and appearance. Picking the correct or wrong is a sensible decision. An important value for kids since it helps them develop new thoughts, knowledge, and creative works. It also teaches them to respect and value other people's contributions. Children can develop integrity in their families and at school. A person who cultivates inner integrity and lives by it will prosper and have the fortitude to overcome obstacles. Students show integrity by providing original work and finishing individual assessments on their own, being dependable and reliable in their work, abiding by the regulations of the school, and following the standards and expectations for assignments and tests set forth by their instructors and being trustworthy and dependable in their work, abiding by the rules of the school and not attempting to gain an unfair advantage in exams or assessments, treating others equally and fairly without regard for self-interest or prejudice, completing their individual and group work to the best of their abilities and being accountable to themselves, their instructors, classmates, and the school, asking for help when they are having trouble, and being brave and standing up for what is right despite difficult circumstances. "Be brave enough to refuse. Embrace the truth with boldness. Act morally because it is right to do so. These are the secret ingredients for leading an honourable life.

ENVIRONMENT DAY

Every year on June 5th, millions of people all over the world celebrate World Environment Day. The United Nations Conference on Human Environment, which took place in Stockholm in 1972, is where the idea for World Environment Day initially emerged. The main goal of this global celebration of this occasion is to make people aware of the effects that their actions are having on the environment. This increases people's awareness of their actions, encourages them to cease harming the environment, and increases their worry and sense of duty toward the planet. By uniting governments and citizens, this aims to provide the environmental cause a worldwide platform and elevate the protection of the environment. Did you know that to sustain our current style of life, it would take 1.6 Earths, and ecosystems could not support it?

FROM THE DESK OF THE SCHOOL HEAD

"Part of our formal education should be training in empathy. Imagine how different the world would be if, in fact, it were reading, writing, arithmetic, and empathy." -Neil de Grasse Tyson

Teaching empathy to students is critical for mankind as a whole. Teachers are more likely than ever to actively create a healthy classroom culture given the diversity of pupils who enter classrooms each day. The foundation of a positive classroom environment is empathy. It supports the development of positive friendships based on trusting interactions by assisting kids in learning about and understanding one another.

Relationships between students and teachers are also strengthened. Young kids can learn and practice empathy and theory of mind through reading fiction, which helps them comprehend how other people feel and think. Their brains are wired to have the same sensitivity as real individuals because of the empathy they feel for fictional characters. Reading is crucial for developing minds.

Ms. Genevieve Michale,
Principal - TCPS (Neptune)

Tete - e - Tete with our Parent

Mr. S. Suresh Kumar

Parent of Sura Yaswanth Sai Kumar Varma in
Conversation with Principal

What is your feeling about SuraYashwanth's growth in TCPS-NEPTUNE?

My son SuraYashwanth studies in grade IX. I enrolled him in the year 2021. My son has always been very shy and reluctant. After joining this school he has opened up gradually and started enjoying going to school. All this could not be possible without the extended support of the school management and the teachers of his class. When I look at where he started the transformation is amazing.

Could you share with us the efforts put by the school?

The teachers have always been very supportive and patient. He is given opportunities to come forward and prove himself. I am totally satisfied with the school

Voice of a Teacher

Ms. Qhushi Zameer,
HRT Mentor

TEACHING IS MORE THAN IMPARTING KNOWLEDGE, IT IS INSPIRING CHANGE.

Every child is a different kind of flower. All together, they make this world a beautiful garden. In the same way, teaching style and approach should be different to make the flowers blossom. Learn about your students and the things that can set them off as part of a preventative strategy. Learn what their interests are and design activities accordingly.

Relationships between students and passionate teachers will always be the foundation of successful classrooms. Use innovative instructional strategies such as Whole Brain Teaching to activate students' brains with the goal of maximizing engagement in the learning process. A good education can change anyone. A good teacher can change everything.

FIELD TRIP TO GOLCONDA FORT

A field trip helps students learn the concept practically. So, as a part of field trips, our school took us to Golconda Fort, which is located in Hyderabad, on the occasion of Telangana Formation Day, i.e., on June 2nd. It was a great experience from the beginning of the journey. Once we arrived, we immediately started climbing as we were so excited. On the way, there was a Mahankali temple, so we took blessings. We were so tired by the time we reached the top-most point as it was so sunny, but it was worth it for the view and fresh air. We also saw the jail while coming back where Sri Ramadasu was imprisoned. We got to know the history of the fort. It was fun trying to lift the 240kg stone that was put there to get employees.

FROM THE DESK OF THE SCHOOL HEAD

"Leaders are not born, they are made, the great philosophers proclaimed". But who creates these leaders is the real mystery. Do people acquire leadership skills on their own? Leadership qualities are acquired via people, situations, and opportunity. Treat children as unique individuals with their own ideas, interests, and opinions in order to help them develop leadership abilities. It is important to foster in children a sense of self-worth.

This can be accomplished by appreciating the procedure and the effort made. Children should think that their worth is unaffected by success or failure. Give people the chance to collaborate. They should be taught to share and respect one another, whether it is through a game, a school assignment, or just a pleasant task. A ability that can be learned, honed, and enhanced is leadership.

What changes have you noticed in the your child after joining Creek?

I am pleased with how my child has started to advance in every manner. She is encouraged to take part in all the activities since she is interested. Future progress should be far more significant, in my opinion.

Does your child look forward to going to school and learning?

She looks forward to going to school. She talks about her interactions with teachers and the fun she had with her friends.

Do you have any suggestions for areas we should focus on?

I'm content with the school. I wish that pupils with learning gaps have more support.

Voice of a Teacher

DEALING WITH SEPARATION ANXIETY

As a pre-primary teacher, I've observed that the majority of kids get anxious and have separation anxiety when they start school. It is my responsibility to make my classroom a friendly and secure space. Parents must participate as well, because they are the partners in support who may inspire and motivate their children. It's generally wise to say goodbye quickly. To reassure your child that you wouldn't leave them if they weren't safe and protected, try to maintain your composure and maintain a comfortable expression on your face and body. Each child's settling time is different. We must make use of patience and kindness along with being supportive

Ms. Neha Panjwani,
HRT Mentor

Messages:

FROM THE OF THE SCHOOL HEAD

A principal who promotes teacher empowerment for democratic school reform is known as a facilitative principal. Teachers are more influenced by the daily tactics and character traits of model principals who use facilitative leadership. At first, transformational leadership was seen as a personal trait that could motivate staff to put the needs of the organisation ahead of their own. The idea has changed, and it is now frequently seen as a wide tactic referred to as "facilitative." Facilitative leadership is described as "the behaviours that promote the collective power of a school to adapt, solve problems, and improve performance" by David Conley and Paul Goldman in 1994. Collective is the crucial term here, and the facilitative leader's job is to encourage participation from staff members at all levels.

The importance of principal support and democratic, facilitative leadership in establishing, putting into practise, and maintaining workable models of shared decision-making and teacher empowerment at the school level has recently come to the attention of educational reformists. This kind of leadership orientation is also known as a "power through" or "power with" approach. Such a strategy aims to empower people rather than dominate them. Principal behaviour has an impact on several aspects of teacher empowerment, including the importance of elements like principal trust, respect for teachers, support for staff development, praise, vision, support of teachers' decisions, listening and giving enough time for the development of cooperative relationships with teachers, high energy, a positive attitude, enthusiasm, the capacity to accept criticism, more significant innovation, and greater motivation. Effects on empowerment, however, are only sporadically mentioned in terms of increased classroom flexibility, a sense of shared ownership, more conversation, and practise critique.

Mr. Soumitra Singh Thakur

What is your opinion about your child being in this school?

We are happy to be associated with the school as it is a good place to learn with good infrastructure and regulations.

How does your child feel at school?

The school tries to give every student a chance to succeed and my child is happy to be here. We would like to give a rating of 10/10 for the effort and support provided by all the dedicated instructors who support and mentor the children.

How do you want your child to proceed further in life?

We want our son to be the most exemplary citizen he can be, with high moral standards, and to be successful in any field he chooses, with The Creek's help.

Voice of a Teacher

5G Technology

TECHNOLOGY OF 5G the most recent iteration of cellular technology, known as fifth-generation wireless (5G), is designed to greatly boost the speed and responsiveness of wireless networks. With 5G, wireless internet connections may transport data at multi-gigabit speeds, with peak rates that, according to some estimates, could reach 20 gigabits per second (GBPS). These speeds are faster than those of landline networks and provide latency of five milliseconds or less, which is beneficial for applications that need real-time input.

Mr. CH SRKV Prasad,
IT Mentor.

Due to increased bandwidth availability and improved antenna technology, 5G will result in an increase in the volume of data transferred through wireless networks. To meet the growing reliance on mobile and internet-enabled gadgets, the government will roll out 5G networks and services over the coming years. As the technology is deployed, it is anticipated that 5G will lead to a variety of new applications, uses, and business cases.

WORLD ENVIRONMENT DAY

The United Nations Environment Programme (UNEP) has organised World Environment Day, which is celebrated every year on June 5th. The largest global venue for environmental public education, World Environment Day is observed by millions of people all over the world. 2022 will mark World Environment Day in Sweden.

The campaign's tagline, "Only One Earth," emphasises "Living Sustainably in Harmony with Nature." Nature is in a state of emergency as time is running out. By 2030, we must have yearly greenhouse gas emissions if we want to limit global warming to less than 50 degrees Celsius. Without action, exposure to air pollution would rise by 50% within a decade, and by 2040, the amount of plastic debris entering the marine ecosystem will have nearly tripled.

PARENTS ORIENTATION PROGRAM

Parent Orientation Programme at the beginning of the academic year for all the grades serves as an excellent prelude to bond school, parents and students for the common goal- the child's progress. Most parents think enrolling their kids in the top school is good enough. However, this is not the reality. The school alone isn't responsible for the all-around development of the kid.

All the students' parents were invited and given a walkthrough of all the school processes. This way, parents can understand what their kid goes through each day. Parent orientation programs also help parents voice their opinions. Parents usually notice many issues in their kids' education or school. However, most cannot voice their opinions. It was a fruitful program that clears parents' ambiguity. Fortunately, parent orientation helps fill this void. You can tell the authorities what you feel about the school and the system. Parent orientation programs hold more importance than you think. Such events help ensure your child's overall development. So, make sure to always attend such events/programs without fail.

FROM THE DESK OF THE SCHOOL HEAD

“Honesty is telling the truth to other people, and integrity is telling the truth to myself.” This famous saying describes integrity in a perfect manner. There are a number of moral principles and ethical guidelines that must be followed in the academic community. Academic Integrity is what this entails. For people to thrive and infuse morality into their lives, they require integrity. Since academic integrity is a crucial attribute for students, it should be cultivated from an early age.

We have given students some advice at school on safeguarding the integrity on the premises

Tips for Preserving Academic Integrity

- 1) Attend classes regularly
- 2) Clarify instructions.
- 3) Plan ahead.
- 4) Recognize where to turn for help.
- 5) Follow directions.

Ms. B. Preethi Reddy
Principal - TCPS (Sr. Seeds)

Tete - e - Tete with our Parent

Parent Orientation 2022-23

We have organized an orientation programme in June, for the new & existing set of parents to familiarize them, “as partners in progress” with the curriculum, rules and regulations of the school, teaching methodologies and the co-scholastic activities. The Orientation began on a thought that was as follows: “A parent is a teacher at home and a teacher is a parent in school and the child is the centre of our universe.” Welcoming parents to the new academic session, Ms. B. Preethi Reddy - Principal, The Creek – Senior Seeds campus spoke at length about the benefits of effective communication between parents and teachers; she laid emphasis on a strong connection with the school patrons. She even sought support and suggestions from the parents to provide best education and growth opportunities to the children of the school, and shared few tips on good parenting.

Voice of a Teacher

Dr. TINA BANERJEE,
English Mentor

The "monsoons" bring respite from the sweltering summers and go hand in hand with lovely, greener, cooler days that are ablaze with rainbow colours. But to our dismay, they may also pose health risks for children, making it crucial to figure out how to keep them healthy and developing. Here are a few examples: Wear well-covered garments at home to protect yourself from mosquitoes. Avoid outdoor food and water to avoid contracting water-borne infections. Maintain good hygiene by dressing in clean clothes after taking a warm bath. Consume citrus fruits, which contain vitamin C and fibre, as well as juicy plums, guava, kiwi, amla, lychee, and apples, all of which naturally boost immunity, to protect yourself from the flu. So let's teach our kids to do this so they can enjoy the monsoons in safety and health.

Voice of a Student

WORLD ENVIRONMENT DAY

Every year on June 5, we commemorate World Environment Day in an effort to conserve resources and re-establish a connection with nature. Unfortunately, a variety of human activities, such as deforestation, mining, industrialization, etc., are harming the environment today. On World Environment Day, we all participate in efforts to raise awareness of and make commitments for environmental protection. OUR SCHOOL'S BIRTHDAY POLICY If we grow a tree, birthdays will mean more. On the day of our birthdays, we might remember the day we were born by giving something to the environment by planting a tree. It will be a demonstration of love for the planet. "Plant more trees to improve the environment; don't make trees rare."

FROM THE DESK OF THE CENTER HEAD

Nurturing 21st century learners!

What we expose a child to is what they will most likely carry with them, whether for a few months or a life time. It is critical to be mindful of what is being said to the child as it influences how they perceive the world and themselves. Belief in your child's academic ability can actually improve his/her grades. Research shows that when students believe they are great, they will do everything to attain greatness. Hence, it is very important to be optimistic and use only encouraging and empowering words when talking to a child at school and at home. At this young age, our responsibility as adults is to provide children with the foundation for a positive attitude and the appropriate support and encouragement. We, as educators, and you, as parents, are building tomorrow's future. Let us work together to ensure your child is prepared for the world of tomorrow!

Ms. Vani Lanka,
Center Head - SPS (Mars)

Tete - e - Tete with our Parent

Mr & Mrs. Jitender Veeramalla,
Parents of Kum. Advitha Veeramalla, II A1

How do you feel about academics and school curriculum?

The school has good curriculum and follows the monthly log, providing equal opportunities to participate in various activities like school assembly, competitions and CCA activities. Worksheets are very well planned which are enabling the child to gain confidence and self-esteem. We feel very happy about my child and have seen many changes in reading, writing and presentation skills. Overall, I appreciate the Principal, teachers and support staff of the school.

What do you see as your child's greatest strengths and what makes you feel proud of your ward?

Advitha has put efforts in making friends and keeping them in touch. She is a good listener, has good sense of humor, workaholic, tells the truth and apologizes when needed. She will remember the most of the things happening around her, maintains discipline and follows parents protocol. Finally, we feel proud about her and thank God for gifting us such a wonderful daughter.

Voice of a Teacher

COLLABORATIVE EFFORT IS IMPORTANT!

The pandemic has brought about a lot of challenges to the pre-primary level education system in particular.

In the online mode of learning, students went through a major change such as: lack of direct peer interaction; no proximity to the teacher; not being surrounded by an environment conducive to learning; inadequate physical activity-based learning; etc.

All the above has brought out certain repercussions for the offline classes that have resumed now. We observe that though the students are active, their speaking, reading, and writing skills have significantly reduced, and they get disturbed very quickly. Keeping in view the above problems, teachers have to develop new strategies for the positive engagement of students in the classroom. This calls for a collaborative effort from the teachers and parents every single day.

Ms. Usha Rani Bodduru,
Pre-Primary Mentor

MY EXPERIENCES DURING FIELD TRIP

A wonderful morning it was. In anticipation of our field trip to Zoo Park, I got up early and was excited to get to school. We enjoyed seeing a rhinoceros, a large monkey, and a large tortoise. Seeing both a white and a Royal Bengal tiger was incredibly wonderful.

We were all excited to finally spot a lion after a considerable amount of walking. We were all startled by its deafening roar. Moving on, we came across ostriches, many bird species, and a stunning, tall giraffe. Our teachers informed us about several animal species, their habitats, and eating habits throughout the entire tour. Overall, it was a lovely trip that we greatly liked.

LEADERSHIP IS A VISION-INVESTITURE CEREMONY”

"Before you are a leader, success is all about growing yourself. When you become a leader, success is all about growing others".

To inculcate leadership qualities in the students, a school council was formed after scrutinous elections and selection. The young leaders were conferred with badges and sashes in the investiture ceremony, which was graced by Mr. Sandeep Bollineni - Deputy

Director Accounts, FEI. The young leaders took the pledge to hold the school's vision and goals. Our Center Head, Ms. Vanilanka Ma'am, addressed the students and reminded them that with position comes responsibility and that the leaders have to be role models. We congratulate the young leaders and wish them all the luck. The student council leaders for the year 2022- 23 are Head Boy - Abhiram . P Head Girl - Prachitha Group Captains : Themisto - Moksha Callisto - Devaditya Prospero - Karthikeya Stephano - Harshitha Reddy Cultural Seceretary – Amritha

Messages:

FROM THE DESK OF THE CENTER HEAD

“The supreme quality for leadership is unquestionably integrity. Without it, no real success is possible, whether it is on a section gang, a football field, in an army, or in an office.” – Dwight D. Eisenhower.

Integrity is said to be the act of behaving honorably, even when no one is watching. Our school places a strong emphasis on teaching pupils academic integrity in addition to personal integrity, which is one of our basic principles. Integrity means keeping your word though it requires extra work. It is a dedication to upholding six core principles: honesty, trust, fairness, respect, responsibility, and courage even in the face of hardship.

We make sure that our kids are aware of the following things at all times in class. Set an example for others to follow, practice open communication, take responsibility for your actions, report inappropriate or unethical behavior, be kind and considerate, and maintain emotional control. Integrity, in my opinion, is an attribute that leaders must have in abundance and we wish for all our students to grow in it as they journey with us at school.

**Ms. Shanmugavalli Anisetty,
Center Head - SPS (Uranus)**

Tete - e - Tete with our Parent

Mr. & Mrs. P. Praveen Kumar & Sindhu
Parent of Kum. P. Aria -PP2 Emeralds

How do you feel the difference between online and physical classes.

Compared to her online classes, Aria's writing abilities have significantly increased. When it comes to her food habits and social communication abilities, she has grown more independent. Since the start of the school year, a daily pattern has been established, from waking up until she goes to bed.

Do you have any feedback or suggestion to our teachers, and administration?

No suggestions as of now. When needed, the staff responds quickly. Looking forward to more learning for the kids that is activity-based. Teachers are highly patient with students. The FIS app, which provides all the information and, most crucially, bus tracking, is another thing I'm extremely delighted about.

CRITICAL THINKING SKILLS

Students need to be critical thinkers who can display higher-order thinking abilities in the rapidly changing world of today. They should be provided more opportunities for play, such as role-playing with friends or playing board games, to help develop critical thinking.

**Ms. Jeena Vinod,
HRT Mentor**

Give your child plenty of time to reflect by pausing and waiting. Don't jump in to address an issue right away. Children need challenges to develop, so wait and observe before you act. Ask open-ended questions to encourage critical thinking instead of instantly providing answers. Encourage your child to think creatively and critically by giving them the freedom to consider alternative viewpoints and all potential answers. Spend some time honing your child's critical thinking abilities.

HELP STRAY ANIMALS

Rainfall has been very heavy so far this monsoon. Even though we are still inside, what about the animals? Consider it once and assist these stray creatures. The lack of shelter is one of the biggest problems that street animals encounter during the rainy season. You can get in touch with the closest animal shelter if you come across any street dogs or cats nearby.

Give out some food and liquids. Give used blankets to a sanctuary for animals. These are extremely modest items, but they have a significant impact on the animals. "Express kindness and love to animals too."

INVESTITURE CEREMONY

“Leaders are not born, they are made”.

On 30th of June 2022 SEEDS URANUS elected its future leaders in a simple but organized INVESTITURE CEREMONY hosted by the school management and students. The occasion was graced by Mr. Malleshwara Rao sir HEAD IT FEI as the Guest of honor, who received the guard of honor and presented the council badges to the newly elected members and helped them to take oath and charge of their posts.

Later in his speech Mr. Malleshwara Rao sir advised the young leaders to be abided to the rules and discipline in school so that they can be role models to other students. The occasion concluded with Center Head Ms. Shanmugavalli Anisetty congratulating the young leaders.

SCHOOL CABINET ELECTIONS

The elections conducted at The Creek Planet Schools are very much essential for the students because this kind of activity will mould leadership qualities in the students right from young age. Being part of school electoral process and getting elected as captain or vice captain gives immense pleasure and opportunity to learn many new things and the students were elated for being a part of the same.
