## Annual Teacher Training 2022

The management of FEI provides a platform for educators to enhance their abilities and skills. As a part of professional development of educators Annual Teacher training sessions were conducted from 15th April to 23rd April.

Education is a never-ending process. It doesn't stop after earning a degree and starting a career. Through continuing education, career-minded individuals can constantly improve their skills and become more proficient at their jobs. In the field of K-12 education administration, it is particularly important for school administrators to encourage teachers to pursue professional development, not only to ensure the best learning outcomes for their students but also to be more effective and satisfied in various other aspects of their work.

When educators discover new teaching strategies through professional development, they are able to go back to the classroom and make changes to their lecture styles and curricula to better suit the needs of their students.

### FROM THE DESK OF THE SCHOOL HEAD

Individual acts are motivated by happiness, which raises awareness, develops creativity, and improves social interactions. As a result, happiness is a significant component of the educational system since it plays a vital and important function in the well-being and motivation of school students as they encounter a variety of challenges that can lead to bad repercussions and undesired behaviours. Students' personality development, as well as their intelligence, thinking abilities, creativity, and academic achievement, are all affected by a lack of happiness and joy.

To put it another way, happy lives are frequently made up of a combination of pleasant feelings and significance, both of which are important for a child's learning and well-being. Educators at Creek are subtly developing their students' pleasure and sense of meaning by fostering their emotional health and prosocial abilities by adding social-emotional learning and mindfulness in their classrooms by creating safe and caring classrooms as well as devising engaging classes that generate positive feelings in pupils.

**Ms. P. HIMAJYOTHSNA,**  
**Principal - TCPS (Mercury)**

### Tete - e - Tete with our Parent

**Mr. & Mrs. B. Narendra Kumar & Ch. Prabhavathi**  
Parents of B. Sai Kruthik, VII-A1.

How do you feel being associated with The Creek Planet School?

We are proud to be associated with the school from so many years only because we are very happy with the way the school functions.

As a parent would you like to suggest anything?

We have a small suggestion that if the students from Grades 6-10 are given training for competitive examinations apart from the regular competitive exams, it would be really be great.

What is it that you expect your child to be in the future?

Owing to these two years of Pandemic the children have lost touch of the moral values. Hope that, from now on the children will be back on track and become good citizens. What makes Creek unique than others? The spacious ambience in the bounty of nature and concentration on the students holistic development.

### Voice of a Teacher

#### HAPPINESS

**Ms. R. Kalpana**  
**Social HOD**

Our greatest happiness does not depend on the condition of life in which chance has placed us, but is always the result of a good conscience, good health, occupation and freedom in all just pursuits." --Thomas Jefferson.

Happiness is the satisfaction that life is exactly as it should be. Doing one's work honestly and efficiently brings a sense of fulfilment. Sincerity is an essential component of happiness. Ancient civilizations such as the Incas and Mayans considered happiness to be the secret to love. Even the little things in life bring joy to a grateful person.

Every instant of our lives must be filled with delight. People who are joyful are more likely to relax and smile. Happiness enhances a person's appearance, and a cheerful person is never disappointed, even in difficult circumstances. Happiness, according to scientific research, promotes a healthy lifestyle, helps to combat stress, boosts your immune system, protects your heart, and reduces pain, all of which contribute to a longer life expectancy. As a result, be happy and keep enjoying life.....

## Voice of a Student

### GLOBAL HEALTH DAY

We cannot foresee a society with clean air, safe water, and sanitation tomorrow in the world we live in today, where economies are climate resilient and human well-being is prioritised. The goal of World Health Day is to make this a reality. Every year on April 7th, it is commemorated. This day is dedicated to the global health issue. We all breathe tainted air as a result of our usage of fossil fuels. Mosquitoes are transmitting disease quicker than ever. Land degradation and water scarcity have been induced by climate change, harming people's health. Plastic has found its way into our food. Systems emit greenhouse emissions while producing bad foods that contribute to obesity, cancer, and a variety of other ailments. The COVID pandemic raised public awareness about human health and exposed societal flaws. Everyone in the globe does not have equal access to health care. WHO is working hard to attain this goal. Your health is essential and should not be overlooked. We should look after ourselves while also helping the world in whatever manner we can

### INTERESTING MANTRAS TO BEAT EXAM STRESS

The annual event of Pariksha Pe Charcha conducted on 1st April 2022 by Prime Minister- Modi was live telecasted for our students of Grade X who were getting ready to appear the board examinations. This event helped the students further to comprehend the nuances of taking board and entrance exams in a relaxed and stress free manner.

The students had an enriching experience with fruitful tips during the session. The PM urged the children to find their inner capacity and strengthen them further to develop their knowledge not just for exams but for their overall development.

### FROM THE DESK OF THE SCHOOL HEAD

“A POSITIVE MINDSET BRINGS POSITIVE THINGS”

Positive thinking always keeps a person happy and positive. It even enhances our energy and brings lot of good energy to do any work. It refers to a belief or mental attitude which makes us think that good things will happen eventually and our efforts will pay off sooner or later. With positive thinking, you can achieve emotional balance, which actually helps the brain to execute functions properly. With positive thinking comes happiness, which is a very important value we need to imbibe. Happiness renders a positive effect on health as well; it lowers stress and improves our overall wellbeing.

Start paying attention to your ideas and replace the negative thoughts with productive, happy and positive thoughts. “KEEP YOUR THOUGHTS POSITIVE BECAUSE YOUR THOUGHTS BECOME YOUR WORDS” “KEEP YOUR WORDS POSITIVE BECAUSE YOUR WORDS BECOME YOUR BEHAVIOR”

Principal - TCPS (Neptune)**

## Tete - e - Tete with our Parent

**Mr. & Mrs. Sardar Dilbagh Singh and Baldeep Kaur**  
Parents of Kum. Sardarni Khushneet Kaur, I-A1

How has the school teaching enhanced your child's learning and growth?

My child has improved immensely when compared to the last year and the credit goes to the hard work, dedication of the teaching faculty. Few improvements that we have clearly noticed are her Reading skills & Writing Skills. She enjoys her classes and keeps surprising us by joining the letters and picking tough words for her age so effortlessly. Now, she writes more confidently and comfortably with less mistakes. Even in Hindi language too. We feel so happy and proud to see the way she carries herself on the stage and deliver's her sentences. A big thank you to the class teacher Sri Ramya Ma'am

## Voice of a Teacher

### IMPORTANCE OF SOCIAL SCIENCE

**Mr. Priyam Dutta**  
Social Science Mentor

The study of the activities of the physical and social environment; more specifically, human relations or the scientific study of human society is referred to as social science. It is important because its study helps us gain knowledge of the society we live in.

Generally, social science focuses on the relationships among individuals in society. It is a mixture of many subjects, like history, geography, political science, economics, sociology, social psychology, and many more. It gives knowledge about civilization and culture; it develops social behavior, civil qualities, power of thinking and reasoning, feelings of universal brotherhood, modernization, suitable proficiency and good habits, moral and social values, and all-round personality.

### A TRIVIA BASED ON SCIENCE

A science quiz was held at The Creek Planet School-Neptune on May 11th, 2018. This quiz was conducted under the supervision of teachers. Students from grades IV to X participated. Four of the brightest students were chosen from the four houses. As a quiz based on science, the event contained many questions related to physics, chemistry, and biology. There were four rounds. The students who were the audience actively participated in the event by cheering for their houses. The yellow house (Prospero) won with the leading scores. The winners were awarded with certificates, and this event proved to be very educational and informative for all the students. It was a wonderful experience. I would like to participate in more such competitions.

## Message:

### FROM THE DESK OF THE SCHOOL HEAD

The development of decent and happy people must be the primary goal of schools, especially at a time when an increasing proportion of children may be experiencing emotional pain. We should be the next generation of educators, specifically prepared to teach values and happiness strategies. We educate our kids with the little secrets to happiness at Orbit. To be self-assured and not compare oneself to others; to confront bad thoughts and focus on the good elements of life; to appreciate the small pleasures in life; to share their knowledge with their friends; to spread joy like wildfire; and to recognise that happiness comes from inside.

**Ms. K Shireesha,  
Principal - TCPS (Orbit)**

Education should play an important part in encouraging young people to be happy. The happiest society is one in which everyone is happy, and we are happy to be a part of it.

## Tete - e - Tete with our Parent

**Mr. S Sridhar Parent of S Jagruthi G II-A1  
in conversation with Mentor**

What are your thoughts on the kid's performance?

The educational gaps created by the pandemic are progressively being covered and thanks to the commencement of physical school. We were able to observe the child's progress. She enjoys attending to school and engaging in all of the extracurricular activities.

Would you like to give any suggestion for improvement?

I am happy with the academic and extracurricular pursuits. She requires more encouragement to participate in class because she is a sensitive child. Encourage kids to interact with kids from different classes. This will aid their social development.

## Voice of a Teacher

### SUMMER TIME BRINGS OUT THE BEST IN KIDS.

**Ms. Chalapathi Pranitha,  
EVS Mentor**

Summer vacation is the ideal time of year since it allows a child to unwind and try new activities. Kids should be strategically engaged so that even recreational activities inspire them to be creative. Poetry and story writing, to mention a few, can be offered to a child to aid in the development of his imagination and creativity.

Play indoor games with the child, cook and bake with them, and give them minor roles in the domestic duties to keep them constructively involved. These activities will allow you to spend quality time with your child while simultaneously teaching them to be responsible and self-sufficient.

## Voice of a Student

### I REMEMBER THE DAY I TOOK MY PET TO SCHOOL.

On 13th of April, my school hosted a pet show. My buddies all came with their pets. The majority of them were dogs, with a few cats and aquarium fish. I was ecstatic to bring my pet turtle "Duke" to school and talk about him. My pet was shown to my friends and instructors. I discussed my pet's dietary habits, as well as its name, age, and the amount of time I spend with it. I also liked observing the other pets because they were all so cute. I wish we had more time to spend together with each other's pets.

### FROM THE DESK OF THE SCHOOL HEAD

Joy, pleasure, contentment, and fulfilment characterise happiness as an emotional state. While there are many distinct definitions of happiness, it is frequently described as involving positive emotions and a sense of fulfilment in life. When most people talk about happiness, they may be referring to how they feel right now or a more general sense of how they feel about life in general. Because happy is such a broad phrase, psychologists and other social scientists prefer to use the term "subjective well-being" to describe this emotional state.

Subjective well-being, as the name implies, is concerned with an individual's overall personal feelings about their current situation. The following are two important aspects of happiness (or subjective well-being): Emotional equilibrium: Positive and negative emotions, sentiments, and moods affect everyone. More pleasant feelings than negative feelings are associated with happiness. Life satisfaction refers to how satisfied you are with various aspects of your life, such as your relationships, career, accomplishments, and other important aspects.

**Mr. Soumitra Singh Thakur**  
Principal - TCPS (Venus)

### Tete - e - Tete with our Parent

**Mr. & Mrs. S Manikya Rao**  
Parent of Mast. S. Surya Tej, IX-A2  
in conversation with Principal.

Being parents of "STAR STUDENT", what is your inner feeling about The Creek Planet School?

I feel delighted to recognise my son as a "star student". And coming to the opinion on the school, I can say it is an excellent opportunity to learn in all aspects like knowledge, values, physical activities. And which helps her to grow in this competitive world.

What is your opinion on online studies provided by The Creek Planet School during the pandemic time?

It was well planned and organised the online classes during the pandemic. The information with regard to the online classes was shared lately.

As a parent, how would you be ready to support school and students to achieve the higher benchmarks in the coming years?

We always support the management to achieve higher benchmarks, and my only suggestion is to have some more concentration on academics apart from the extracurricular activities.

### Voice of a Teacher

**Mr. Manohar Rao**  
Hindi Mentor

बच्चों को तुलनात्मक दृष्टि से देखना मनुष्य के जीवन को अंधकार में भेजने वाला महामारी है। हर मनुष्य एक दूसरे से तुलना करते हैं उनके जीवन से, उनके व्यवहार से, धन से, पढ़ाई से और अन्य विषयों से तुलना करते हैं। इसे नादान व्यक्ति बच्चों पर गहरा प्रभाव पड़ता है। विधाता ने धरती को दो भागों में विभाजित किया है पर्वतीय भाग, समंदर या पानी जमीन। इस संसार में दो प्रकारके व्यक्तियों का भी जन्म हुआ है जैसे कि भगवान को बनाने वाले और ना मानने वाले। इतना कुछ अपने आखों के सामने दिखने पर भी हम दूसरों की उन्नति को देख कर उसे पाने के लिए वर्तमान का समय व्यर्थ कर रहे हैं। अपने लक्ष्य को पार करने हेतु निरंतर श्रम करना है अपने श्रम में किसी प्रकार का भी दोष ना रहने देना चाहिए। तन, मन, श्रद्धा व जिस कार्य करने आगे बढ़ रहे हो उसे संपूर्ण पाने के लिए निरंतर कड़ी मेहनत लगन से करना ज़रूरी है। तब एक दिन हम कामयाब हो जाएंगे। दूसरों से तुलना करने से मन में ईर्ष्या, राग उत्पन्न होगा। यह मनुष्य की बुद्धि को भ्रम कर उसके विनाश का कारण बन जाता है। अपने अपने स्थान पर आप महान हो जैसेकि तलवार के स्थान पर तलवार सुई के स्थान पर सुई। युद्ध में तलवार का उपयोग करते हैं, कपड़े सीने के लिए सुई। वे अपने-अपने स्थान पर महान हैं।

### PROFESSIONAL DEVELOPMENT

Professional development is a combination of tools, resources, and training sessions designed to help educators improve the quality and effectiveness of their teaching. Instructors can use these tools to expand their subject knowledge, as well as mentorship and learn new teaching approaches.

Workshops and leadership seminars help participants learn and improve specialised skills such as technical, mathematical, and analytical abilities. Professional development refers to educators honing their skills in order to better meet the needs of their pupils. Collaboration and evaluation assist instructors to improve students' outcomes in this situation. Reviewing case studies, consultation and coaching, mentorship, and technical support are all methods for professional growth. Teachers' professional development ensures that they are prepared to answer every question posed by a student.

### FROM THE DESK OF THE SCHOOL HEAD

#### HAPPINESS IS THE KEY TO STUDENT SUCCESS

Now a days, "success" is primarily connected with a lucrative profession. While happiness cannot be defined as a condition, different elements have varying effects on our students' contentment. As students' emotional health has a substantial impact on their performance, our school prioritises good emotional health and strong social bonds. Their social behaviour, motivation, and decision-making are all affected. Learners who like and find meaning in their work are more likely to put in greater effort. That is why, at The Creek – Sr.Seeds, we have created a positive learning atmosphere and considered offering support and help to students.

To achieve student happiness, we apply two tactics in class and individually: social-emotional learning and mindfulness, and this is the primary responsibility of every educator. Students who practise mindfulness learn to communicate with others without passing judgement and to accept themselves and others as they are.

**Ms. B.Preethi Reddy**  
Principal - TCPS (Sr. Seeds)

### Tete - e - Tete with our Parent

**Mr. & Mrs. Kamal and Sandhya,**  
Parents of Ayanash and Reyansh Panda, PP-II

What are your thoughts on physical schooling?

As parents, we prefer to send our children to actual school rather than online schooling. It is extremely beneficial to both children and parents. Leaving covid aside, children are prone to health problems, but thus far, both children have maintained 100 percent attendance, and we, as parents, will continue to focus on this aspect.

Have you seen any significant changes in your children?

Since they started going to school, they are greeting everybody hi, hello, bye and they do not hesitate to stay among other people. Both kids have never said no to school, which makes us wonder what they do and how they interact with teachers and friends.

### Voice of a Teacher

**Ms. Swathi Srikanth**  
English Mentor

**“Education is a shared commitment between dedicated teachers, motivated students and enthusiastic parents with high expectations” - Bob Beauprez.**

Schools use a number of imaginative techniques to involve parents in their child's learning. Most educators would not be surprised to learn that family involvement in school is a crucial predictor of a student's performance. Putting in place procedures such as a schedule, breaks, and a cheat sheet are all beneficial. If you're having trouble persuading your child to finish their homework, here are some suggestions: Create a week's worth of tasks: Meeting with younger children on a regular basis and detailing the tasks they must complete each day, as well as giving them with a calendar to plan the schedule. Break learning down into little chunks: If students are working on a project that will take several hours, break it down into smaller portions. Set timers for 20 or 30 minutes and have them focus on their task for that amount of time, then allow them 10 to 15 minutes to play, rest, go outside, or anything else they want to do. Prepare some additional activities like Art or Music and each child should be naturally driven to do their assignment on time and without being harassed. Make a list of things your child would like as a reward with them and appreciate them with rewards.

## Voice of a Student

### THE GREATEST WEALTH IS HEALTH

On the eve of World Health Day which is meant for good health, a healthy diet nutrition and exercise should be observed. Every year on April 7th World Health Day is observed to understand the importance of health and to draw people's attention to health. Health is important for everyone, especially for children.

Eat less CRAP: C – Carbonated drinks. R – Refined sugar. A – Artificial sweeteners and colours. P – Processed foods. Eat more FOOD: F – Fruits and veggies. O – Organic lean proteins. O – Omega 3 fatty acids. D – Drink water.

### FROM THE DESK OF THE CENTER HEAD

Happiness! We use the term without giving it any attention. We all want to be happy and lead a "good life," whatever that means. Knowing whether or not we are happy from within is critical because when our activities are motivated by enjoyment, nothing appears to be a burden. Happiness, in my opinion, consists of obtaining all of the goods — health, prosperity, knowledge, friends, and so on — that lead to the perfection of human nature and the enrichment of human life over the course of a lifetime.

Children must be able to handle and conquer their anxieties, worries, limiting beliefs, and challenges in order to be happy. As a result, it's critical that we prioritize their basic well-being at school. This has the potential to greatly boost student academic attainment while also creating an environment that inspires happy learners who can contribute to happier communities and, eventually, a happier planet.

**Center Head - SPS (Mars)**

## Tete - e - Tete with our Parent

**Ms. G. Chaitanya,**  
Parent of Kum. Samana Gopathi II-B  
in conversation with mentor

What do you feel is going really well for your child in this school, and why?

The school is providing equal opportunities for my child to participate in assembly, various competitions and CCA activities. This is enabling the child to gain confidence and self-esteem. We feel very happy that she is very much interested to go to the school and doesn't want to miss even a single day. We have noticed positive changes in her reading and writing skills too.

Share few lines about your child being selected as a star student. I am happy to see her progress, it's very motivating for her and grateful that her efforts have been noticed and rewarded. I am thankful to all the teachers for supporting her in academics and her overall development.

### HEALTH IS WEALTH - WORLD HEALTH DAY

**Ms. Ruqsana Khatoon**  
**Grade II Mentor**

As we all know, It is of immense importance to stay healthy. Healthy does not always mean physical health, it also means mental and social well-being. Healthy people are more productive and tend to live longer, disease free. World Health Day which is celebrated on the 7th of April every year focuses on the same.

To promote healthy wellbeing and to make our students understand its importance, many activities were conducted in the school. Children came up with charts, dance forms to celebrate healthy living. Children were all excited when Dr. Sujatha Reddy, Parent of SEEDS MARS visited our school as part of resource talk. She shared the importance of healthy eating and shared a few tips to stay hydrated during the summer season.

### DEVELOPMENT IS A CONTINUOUS LEARNING PROCESS

Learning is a never-ending process. The world of work is rapidly changing, and people need lifelong learning to advance their skills and stay relevant. To help teachers sharpen their saw, FEI promoted the Futuristic Edu SKILL DEVELOPMENT ACADEMY (FESDA), a PDQ training centre that serves as a nexus for all of the school's staff members' professional and personal growth. The University College London's Cambridge Professional Qualifications (PDQ) Development are practice-based, in-service qualifications (UCL).

We are happy to share that our teacher, Ms. Usha Rani Bodduru, has earned a Certificate in Teaching with Digital Technologies and received her certificate in the award ceremony that was conducted in The Creek Planet School Venus campus Auditorium-Kaleidoscope.

## Idea Bank

Old newspapers can be used to make compost. Shred newspaper along with leaves and vegetable scrap can be made as compost which helps in healthy growth of plants.

**Mast. Narasimha Sri Karthikeya Akella**  
III-B

Milk bags can help in storage. Wash the milk bags after use and dry them. We can use it to store leafy veggies, chillies and vegetables in small quantities.

**Kum. Medha Sree Reddy**  
I-A1

Old newspapers can be used to clean windows, glass panes and mirrors. Cleaning with newspaper leaves no dust and adds shine to the glass surface.

**Kum. Harshita Koya**  
III-A

Milk bags are ready to use waterproof storage. Wash and dry the milk bags after use. We can use it to cover electronic devices like mobile, camera etc., while travelling as it acts as water proof cover.

## Messages:

### FROM THE DESK OF THE CENTER HEAD

“Happiness is a journey...not a destination.” Happiness is not something that happens to you, but it is something that you choose to do. The key to being happy is knowing to make the right choice of what to accept and what to let go. We need to teach our children to identify their emotions and how to regulate it, to lead a joyful life. By learning happiness and practicing strategies to enhance well-being, children open up, increase academic performances and grow into responsible and happy adults.

**Ms. Shanmugavalli Anisetty,  
Center Head - SPS (Uranus)**

The five simple mantras to keep ourselves happy would be to connect - with family and friends , Being Active by playing, exercise, dance or learning music ,enjoying our surroundings and nature around us , Learning a new skill and by practicing gratitude.

### Tete - e - Tete with our Parent

**Mrs. Atchuta Mani Bindu,**

Parent of Mast. Venkata Vaishnav Atchuta, I-A2  
in Conversation with Mentor

How is your child enjoying physical classes?

Initially our child started coming to school crying and was reluctant, but later slowly he started loving the school environment, his teacher, and his friends. He is learning the concepts in school and his learning is independent. The best part is that he corrects us when we make an English grammatical error.

Would you like to suggest anything to our mentors or management?

We are very happy with the mentors and the management. The management is so supportive and keeps us updated about all the changes and new updates. In addition, the mentors are doing their best to create a positive learning atmosphere. We do not have any suggestions to give at the moment.

Math Mentor**

### PARENT TEACHER RELATIONSHIP: THE THREE IMPORTANT C'S

Positive and constructive relationships between teachers and parents have shown a great improvement in children's academic achievements, social competencies, and emotional well-being. Relationships are most powerful when they include three main components, represented as the "3C's": communication, consistency, and collaboration. Frequent two-way communication is important to stay apprised of what is happening at school and let the teacher know the important things about the child. Creating routines and providing consistent opportunities to enhance a child's learning at home reinforces the notion that teachers and parents are working together to support him/her. A collaborative and cooperative relationship between parents and teachers helps children to achieve their highest potential.

### PROFESSIONAL DEVELOPMENT

Teachers often learn through informal interactions like peer teaching, collaborative planning, but professional learning through a proper institute is the only education that ultimately changes classroom practices. Believing the same FEI constantly encourages all its professionals to keep themselves updated to cater the needs of the ever-changing teaching learning methods of the present generation.

FEI provides the opportunity of professional development to its teachers and school leaders through FESDA (Futuristic Edu Skill Development Academy) through which teachers can enroll for many global skill development certifications. We are happy to announce that our Center Head Ms. Shanmugavalli Anisetty and mentors Ms. J. Deepthi and Ms. Trupti Kulkarni have successfully completed the certification this year and most of our existing teachers have already completed these certifications in the previous batches.
